

Volume 2 no.11

SUNY CPD by the Numbers

SUNY CPD has just concluded a review of critical data points for Academic Year 2021/2022. During this time, SUNY CPD offered and supported a total of **196 courses, workshops, webinars, and conferences, consisting of 81 programs and about 14,000 registrations.**

This year, Program Development staff conducted a **Return on Investment Study** and benchmarked the per person cost of attending a SUNY **CPD Certificate Program** to attending a comparable Non-SUNY program and found that SUNY CPD provided **savings to campuses of well over one million dollars.** We will continue our ROI analysis of supporting and delivering **SUNY-wide Conferences** compared to attending a conference outside of SUNY of similar content, audience, and length.

The increased demand for online resources that began during the pandemic has not slowed down. The SUNY CPD **YouTube Channel increased 25%** in number of subscribers and garnered visitors spending a total of **3,412 hours** viewing CPD program content. The most popular topics viewed were:

- o **Hyflex**
- o **Brightspace**
- o **Diversity**
- o **Digital Accessibility**

Next month, we will publish the detailed Annual Report, highlighting critical work being done in **Innovative Instruction Technology (IITG), DLE/Brightspace training**, and supporting **hybrid and online** events.

Thank you for your continued support.

- Lisa Raposo, *Interim Director*

[SUNY WIT \(Women In Technology\) Program](#)

In support and partnership with **SUNY WIT**, the CPD announces a new webinar series.

Women in IT Empowerment: Charting Your Own Path, is a series of four Zoom sessions that each cover a topic related to Women in the IT field and the various inequalities they face within the male dominated industry.

The goal for the series is to provide an inclusive and diverse atmosphere working to connect people identifying as women and their allies in the Information Technology field. SUNY WIT seeks to engage the IT communities in direct efforts to advance social justice and equity goals of SUNY, improve the SUNY employer brand, educate on the expanding definitions of IT, and overall give the audience the tools necessary to be empowered in their careers.

CALL FOR PROPOSALS

Project-based learning, collaborative assignments, public-facing scholarship, and ePortfolios are examples of open practices that empower co-creation, changing the learning environment from passive to dynamic. This SUNY-wide conference provides a place to share tools, pedagogical methods, and support structures designed to encourage exploration, experimentation, and innovation.

Looking for presentations in the following themes:

- Supporting students' digital fluency
- Amplifying underrepresented voices
- Universal design for learning
- Open pedagogy
- Connecting course contents to students' professional online presence
- Building confidence and encouraging students to take digital risks

Deadline for proposals: September 30th

MS Azure / Data / Security Classes

Instructor Lead Virtual Training

The SUNY CPD's Technical Program has facilitated **deep discounts** on Microsoft Technical Training.

Through Microsoft's **Enterprise Skills Initiative (ESI)** program, SUNY Campuses are eligible to attend Microsoft classes (mostly focusing on Azure and other cloud based skills) for \$500 or less. These are regularly priced from \$2,000 to \$3,000 dollars.

Classes are similar to those you can access online directly through the Microsoft ESI

Classes are similar to those you can access online directly through the Microsoft LSI program portal, but they are offered through an **online learning platform and are live classes with an instructor teaching it.**

This partnership is open to SUNY Campuses with CPD Technical Member Campuses being able to utilize their Technical Points as payment.

For more information about available courses and how to register please contact **Kris Lynch**, Technical Program Manager at SUNY CPD - kris.lynch@suny.edu or (315) 214-2426

Reviewing New Open Access and Research Data Requirements

Tuesday, October 25, 2022 @ Noon

Funding agencies are either requiring that publications and research data resulting from grant funds are made freely available.

For scholarly articles, this creates a need to fund open access. For research data, there is now a need for support services and infrastructure to assist researchers with creating plans for managing their research data.

These new or existing open access and research data mandates warrant a review of the issues surrounding the shift to open access, and what support is needed for researchers who are navigating how to make their research output and data available.

SHANNON PRITTING, Interim Director of the Office of Library and Information Services at SUNY, will review the major issues with shifts to open access and research data management, and will summarize SUNY's current planning and activities in these areas.
