SUNY POLY

Challenges

Where are we now?

1. Obsolete Technology / Security Risks
2. Increased Costs
3. Lack of Standardization
4. Scalability Issues
5. Compliance
6. Negative User Experience

SUNY POLY

Vision

Creating a clear policy to ensure:

- **Consistency**
- **Cost-effectiveness**
- **Alignment with organizational goals.**

SUNY POLY

Goals

Optimize IT Resources

Enhance Productivity

Minimize Risks

SUNY POLY

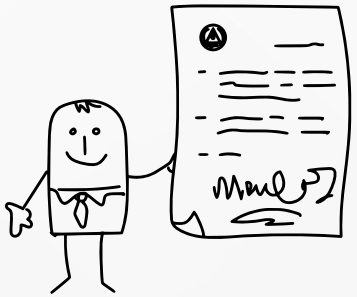
Process and Creation

Identify Stakeholders

Collaborate

Ratify

Implement



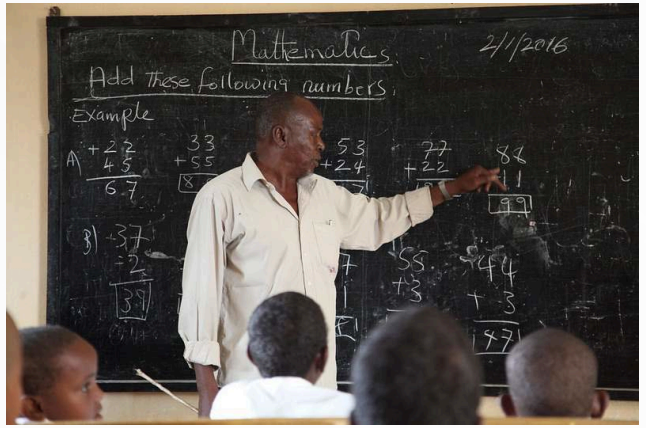
SUNY POLY

Who Do We Need to Engage?

Stakeholders

Information Technology Services

Management (CIO)
Staff



Faculty Assembly

Administration

Guiding Leadership Principles

1

Transparency

- Openness and clarity in decision-making process.
- Clearly defining criteria
- Communicating policy to all stakeholders

2

Accountability

- Clearly defining roles and responsibilities .
- Establishing processes for tracking hardware inventory and lifecycle management.
- Holding Individuals accountable for adhering to policy guidelines

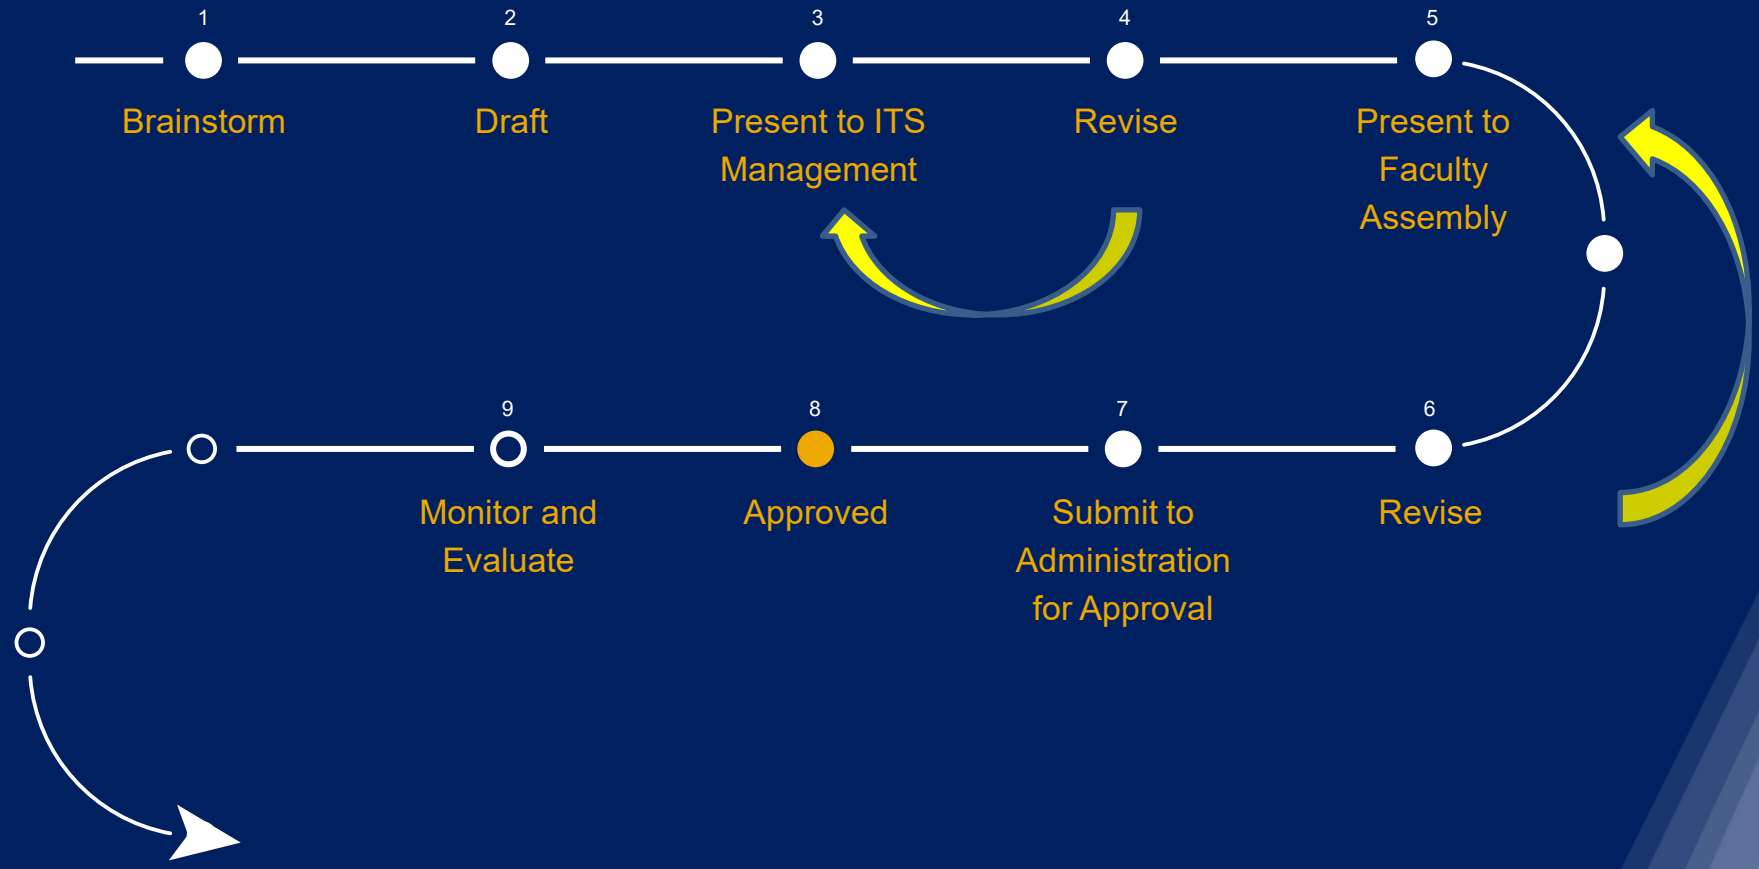
3

Continuous Improvement

- Regularly reviewing and updating policy based on feedback and changing requirements.
- Evaluating the effectiveness and adjusting strategies accordingly.
- Embracing emerging technologies and best practices

SUNY POLY

Implementation Roadmap



SUNY POLY

End Result

- Predictability = Efficiency
- Cost Savings
- Risk Reduction

Improved Student Outcomes

SUNY POLY
